Bristol, Prudential Buildings, Wine Street, Bristol, BS1 2PH |
Cost: Absolutely Free | **Sign-up and more info**:

http://knowledgeunconference.eventwax.com/bristol-knowledge-unconference

Bristol Knowledge Unconference is a very informal conference with a social edge, and will be specifically about Knowledge.

This will be our first "Bristol Knowledge Unconference", so it's experimental and therefore it should be fun!

The event will be "themed" around the general subject of Knowledge, which includes:

- The Semantic Web / Linked Data / Hyperdata / Data Web / "Web 3.0"
- Web Science
- Topic Maps
- Information Architecture and Design
- Knowledge Acquisition
- Knowledge-Based Systems, Knowledge Engineering, Rule-Based Systems (etc)
- Knowledge/Information Visualisation and Graphical User Interfaces
- Knowledge-orientated Search Engine Optimisation (SEO)
- and potentially even, Object Oriented Databases

Talks will be done in a discussion format, so be sure to come with your knowledge based problems and solutions. It'll be great for us all to learn from each other, in addition to building new relationships.

Organised by: Daniel Lewis | **Daniel's Blog**: http://vanirsystems.com/danielsblog
